Education

Vellore Institute of Technology — Vellore, Tamil Nadu
B.Tech – Computer Science Engineering — ***CGPA: 8.84/10*** — *July 2024 – July 2028 (3rd Year)*

- Coursework: Data Structures & Algorithms, Object-Oriented Programming, Computer Networks, Operating Systems, Database Management Systems

Delhi Public School Rohini — Delhi, India
CBSE Class XII – 91.2%

Projects

Loom – AI-Powered Portfolio Generation Platform | *Next.js, TypeScript, PostgreSQL, Prisma* — useloom.vercel.app ↗

- Architected a full-stack portfolio platform on Next.js with PostgreSQL and Prisma ORM, unifying data imported from GitHub, résumés, and LinkedIn into a single structured profile schema.
- Integrated Google GenAI to extract structured fields from unstructured résumé and LinkedIn PDFs, validating all parsed output against Zod schemas before persistence to guarantee data integrity.
- Built dynamic portfolio rendering with selectable themes, GitHub project sync, and a dedicated Recruiter Mode; implemented a privacy-conscious ingestion pipeline that discards raw source files post-extraction.

Flux – Task Management Web Application | *React, Node.js, Express, MongoDB* — flux-space.vercel.app ↗

- Architected a full-stack task management platform with stateless token-based authentication and per-user namespaced MongoDB collections for data isolation.
- Designed a time-decay algorithm for task urgency scoring, using batched MongoDB writes (`updateMany()`) to cut update latency from 500ms to under 100ms on 1,000+ task datasets.
- Implemented offline-first support with IndexedDB, optimistic UI updates, and conflict resolution, alongside a REST API (`GET/POST/PATCH/DELETE`) with cursor-based pagination.

MessIT – Campus App Redesign | *System Design, Figma Prototyping* — App Store & Play Store (VIT Deployment)

- Led a redesign of a high-traffic campus utility app, restructuring the information architecture to reduce navigation depth from 4 taps to 2 for key actions.
- Designed the state-management model for multi-screen flows and validated prototypes through usability testing with 100+ student users.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, C, HTML/CSS
Frameworks: Next.js, React, Node.js, Express.js, Tailwind CSS, Framer Motion
Databases: PostgreSQL (Prisma ORM), MongoDB (schema design, indexing, query optimization)
Tools: Git, GitHub, Vercel, Figma
Concepts: REST API Design, System Design, Authentication, Database Optimization, Offline-First Architecture, AI-Assisted Data Extraction, UI/UX Design

Awards

2nd Place – Hexathon Designathon 2025 | *Google Developer Groups VIT*

- Designed a graph-based expense-settling system that minimizes multi-party settlement transactions through optimal debt consolidation.

Leadership

VinnovateIT – VIT Vellore — Vellore, India
Vice Chairman & Technical Lead — *Jan 2026 – Present*

- Lead technical strategy and execution across 30+ members spanning engineering, design, and operations; set the technical roadmap for 5+ student-led projects.
- Mentor junior developers on full-stack architecture and database design; contributed to 3 campus application launches reaching 500+ daily active users.

XINO – Startup Accelerator Club — Delhi, India
Head of Web Development — *Apr 2023 – May 2024*

- Led a team of 6 engineers delivering 4+ web products and mentored junior engineers on production best practices.
